Muhammad Arifin Habibi

Web Programming | Tech Enthusiast
Subang, West Java, Indonesia

Summary

I'm Muhammad Arifin Habibi, a web developer from Indonesia. I
have skills in web design, web apps, and data science. I've worked
as a website maintainer, fullstack developer, and website developer
for various companies. My expertise includes front-end and back-
end technologies like React and Node.js. I'm passionate about
learning and keeping up with web development trends. I've received
recognition for my web development abilities, including winning a
website design competition.

Experience

ARGA SOLUSI TECHNOLOGIES
1 year 1 month

Maintainer Website
May 2023 - Present (1 year 1 month)
Jakarta Pusat, Jakarta Raya, Indonesia

As a Website Maintainer at Argasolusi Technologies, I was responsible for
ensuring the smooth operation and optimal performance of the company's
website. My primary duties included:

• Performing regular website maintenance tasks, such as content updates,
software updates, and security patches, to maintain site functionality and
protect against potential vulnerabilities.

• Monitoring website performance and troubleshooting any issues that arose,
ensuring minimal downtime and a seamless user experience.

• Collaborating with the development team to implement new features and
enhancements, ensuring compatibility with existing website infrastructure.

• Conducting website backups and maintaining version control to safeguard
data integrity and enable efficient rollbacks when needed.

• Analyzing website analytics and user feedback to identify areas for improvement and recommend strategies to enhance user engagement and conversion rates.

• Ensuring compliance with web standards, accessibility guidelines, and best practices for website development and maintenance.

During my tenure at Argasolusi Technologies, I gained extensive experience in content management systems (CMS), web server administration, and front-end development technologies. My attention to detail and problem-solving skills allowed me to contribute to a well-maintained and high-performing website, supporting the company's online presence and business objectives.

Fullstack Web Development
May 2023 - September 2023 (5 months)
Jakarta Raya, Indonesia

Karya Teknologi Selamat Mandiri Company
Software Engineer
January 2023 - April 2023 (4 months)
Jakarta Raya, Indonesia

As a Software Engineer at Karya Teknologi Selamat Mandiri Company for 4 months, I primarily developed desktop software applications using React and Electron. I focused on building user interfaces with React and integrating them into cross-platform desktop apps using Electron. This role allowed me to enhance my React front-end development skills and gain experience in creating desktop applications with web technologies. It involved working closely with teams and meeting project requirements.

Median Skill
Website Developer
August 2022 - October 2022 (3 months)
Cimahi, Jawa Barat, Indonesia

During my 3-month stint as a Website Developer at Median Skill, I primarily learned and built websites using WordPress. This role allowed me to gain hands-on experience with the popular content management system (CMS). I worked on creating custom WordPress themes, installing and configuring plugins, and managing website content. Through this experience, I developed a strong understanding of WordPress development, including customization, theme development, and website maintenance. Additionally, I enhanced my skills in HTML, CSS, and JavaScript while working with WordPress.

PT. Jerbee Indonesia
Website Developer
May 2022 - July 2022 (3 months)
Bandung, Jawa Barat, Indonesia

I interned as a Website Developer at PT. Jerbee Indonesia for 3 months. It was my first professional programming experience, where I worked on building and maintaining responsive websites. I used HTML, CSS, JavaScript, Laravel, and Vue.js. This internship allowed me to apply my web development skills practically and learn from experienced developers. It helped me improve my problem-solving abilities, collaboration, and attention to detail in delivering quality work. My time at Jerbee was a significant stepping stone in my career as a web developer.
